Technical Expertise

Python | Java | C Programming

- **Programming:** Hands-on experience developing applications using Python, Java, and C
- **AI & Data:** Model training, data preprocessing, and applied machine learning
- **NLP Basics:** Experience building conversational systems with intent handling
- **Collaboration:** Able to work efficiently in teams while managing shared responsibilities

Project Portfolio

AI Student Query Chatbot
Built an NLP-based chatbot that answers academic, timetable and exam-related queries using collected FAQs, intent-tagging and automated response retrieval

AI-Based Question Paper Generator
Built a question paper generator that organizes faculty-provided questions into exam-ready formats based on topics, ensuring full coverage and no repetition

Trading Chatbot
Created a basic rule-driven chatbot that assists users with stock-related queries and provides structured responses inspired by real trading processes
